Experienced in using version control and bug reporting tools like GitHub, & Bitbucket. Experienced in integrating web applications with rest APIs, handling data retrieval & manipulation.

### Dec, 2021 - April, 2022

Talentpace, Bangalore

#### Role: Frontend developer

**Project Name:** LEAP Alankaar

**Technologies:** HTML5, CSS3, Javascript, NodeJs

**Description:** This's a Visual Merchandising app which essentially is an automated APP for merchandising at retail stores specifically designed for merchandisers. It brings the facility to plan & guide merchandisers for in-store execution, stick to defined merchandising guidelines, provide a 'Merchandising Score' of the outlet & corresponding customer marketing team & release the pay-outs to retail outlet based on the in-store execution against an agreed benchmark.

### June, 2022 - November, 2022

Talentpace, Bangalore

#### Role: Frontend developer

**Project Name:** EzeeHR

**Technologies:** HTML5, CSS3, Javascript, SASS

**Description:** Smart Workspace Management - lot is integrated and enabled in an agile workspace, where employees can work in a way that fits their needs. Additionally, this platform helps the organisation manage the number of people at the office. Working from home & canteen management. The canteen management system is essential for keeping track of food consumption & preventing food wastage. This solution helps to track the workspace occupancy integrated IoT solutions while employees working at the office by displaying the information on connected digital monitor.

### January, 2023 - June, 2023

Talentpace, Bangalore
